Remark 1) The assessment criterion is JIS B 7609:2008 6.2 and 6.3 , as follows

$$\begin{aligned} |\text{Expanded uncertainty}| &\leq |\text{Maximum permissible errors}| / 3, \\ |\text{Conventional mass deviation}| + |\text{Expanded uncertainty}| &\leq |\text{Maximum permissible errors}| . \end{aligned}$$

2) The expanded uncertainty corresponds to a level of confidence of approximately 95 % with a coverage factor k being equal to 2.

Note If the decimal places of [Conventional mass deviation] and [Expanded uncertainty] is greater than the decimal places of [Maximum permissible errors] , we consider its missing digits as 0 for our conformity assessment.
